**Requested Analysis**

Perform DNA analysis

**Results of Analysis**

The following analysis was conducted by Criminalist, Chad Hainley.

A presumptive test for the presence of blood was positive for Items 47, 49, 50, 62, 89 and 121. DNA was extracted from Items 13, 16, 17, 18, 19, 23, 25, 42, 44A, 44B, 47, 49, 50, 51, 52, 53, 58, 61, 62, 63, 72, 73, 76, 89, 121, the three suspect blood standards and the two victim blood standards. The extracted DNA was subjected to PCR. The following STR loci were examined: D3S1358, vWA, FGA, D8S1179, D21S11, D18S51, D5S818, D13S317 and D7S820.

The DNA profile from Item 121, stain 1A, 1B, 2 and 3 are consistent with DNA profile of Ms. Aguirre. Ms. Aguirre cannot be excluded as the contributor of the stains. The probability of observing this DNA profile is approximately 1 in 1.65 trillion for Caucasians, 1 in 171 billion for Blacks and 1 in 4.93 trillion for Hispanics. The approximate world population is 6 billion.

The DNA profile from a stain on Item 121 is consistent with the DNA profile of Mr. Aguirre. Mr. Aguirre cannot be excluded as the contributor of the stain. The probability of observing this DNA profile is approximately 1 in 8.13 trillion for Caucasians, 1 in 9.01 trillion for Blacks and 1 in 6.25 trillion for Hispanics. Based on these probabilities, Mr. Aguirre is the source of the stain on Item 121.

The DNA profile from Items 13/stain A & B, 16/stain A, 16/stain C & D, 16/stain F, 17, 18, 19, 42, 61, 62, 62/stain 1 & 2, 63, 72, 73 and 76 are consistent with the DNA profile of Ms. Aguirre. Ms. Aguirre cannot be excluded as the contributor of the stain. Statistical interpretations are available upon written request.

The DNA profile from Items 23, 25, 44A, 44B, 47, 47/stain 1, 49, 49/stain 1-3, 50 and 50/stain 1 & 2 are consistent with the DNA profile of Mr. Aguirre. Mr. Aguirre cannot be excluded as the contributor of the stain. Statistical interpretations are available upon written request.

The DNA profile from Item 89/stain A, 1 and 3 are consistent with the DNA profile of Mr. Perkins. Mr. Perkins cannot be excluded as a contributor to these stains.

The DNA profiles from Items 51/stain A and G, 52/stain A, 53/stain A and 58/stain A and B are not consistent with the DNA profile of Ms. Aguirre, Mr. Aguirre, Mr. Gonzales, Mr. Perkins or Mr. Lugo. These individuals are excluded as a contributor to these stains.

No stains of evidentiary value were detected on Items 94, 95 or 99.

No analysis was conducted on Items 5, 15, 24, 39, 56, 57, 59, 67 or 91.

The DNA profile from Item 89/stain 3 along with the additional loci, D16S539, TH01, TPOX and CSF1PO, has been entered into the CODIS (Combined DNA Index System) database. The profile will be searched

in the casework and convicted offender database periodically in order to help generate investigative leads.

**Disposition**

The remaining cuttings and DNA extracts will be maintained frozen in the laboratory. We are unable to retain the remaining evidence and it will be returned to you under separate cover.
